

ICFO[®] OPPORTUNITIES FOR INTERNSHIPS

ICFO, The Institute of Photonic Sciences, welcomes outstanding students in the final year of their studies from top Universities worldwide, to undertake an internship or their final master project at ICFO.

Selected students are given the opportunity to participate in ICFO's rich scientific life and to benefit from the experience of ICFO researchers, cutting edge facilities, industrial projects, a stimulating and interdisciplinary environment as well as high-level training and broad administrative support.

The ICFO Internships Program offers a wide range of opportunities in any of the photonics-related research fields, including but not limited to:

- 〔 **Biophotonics and Photo-medicine** 〕
- 〔 **Optical Telecommunications and Information Technologies** 〕
- 〔 **Optical Sensing and Optoelectronics** 〕
- 〔 **Quantum Optics and Quantum Information** 〕
- 〔 **Nanophotonics and Nanotechnology** 〕
- 〔 **Nonlinear Optics and Frequency Conversion** 〕
- 〔 **Atto-science and Ultrafast Laser Science** 〕
- 〔 **Green Photonics and Photovoltaics** 〕
- 〔 **Nanoscopy and Super-resolution Imaging** 〕

For further details about the program, available projects and how to apply, please visit the Careers site at the ICFO webpage www.icfo.eu
