

Symposium on Physics and Visual Search: from decision-making to movement ecology

Bellaterra, 4 October 2013

10:20 Opening

10:30 Laura Dempere (Universitat Pompeu i Fabra)

Modelling Visual Attention at the Interface of Computer Vision and Computational Neuroscience of Vision

11:10 Marius 't Hart (Phillips University Marburg)

Gaze in real-world scenarios: interaction of task and stimulus

11:50 Hans Trukenbrod (University of Potsdam)

Spatial and temporal aspects of saccadic sequences

12:30 Giuseppe Boccignone (University of Milano)

Visual attention, eye movements and the foraging metaphor

13:10 Lunch break

14:20 Aldo Faisal (Imperial College, London)

The natural statistics of Movement behavior and the human ethome

15:00 Vivek Nityananda (Newcastle University)

Visual search in bumblebees

15:40 Frederic Bartumeus (Centre d'Estudis Avançats de Blanes)

Random Search Ecology

16:20 Gleb Oshanin (University Pierre et Marie Curie)

Survival of a lazy evasive prey: Modest effort, much success

Lloc: Sala d'Actes, Facultat de Ciències (Entrada lliure)

Organitza:

Grup de Física Estadística
Departament de Física

Coordina:

Vicenç Méndez
Daniel Campos
