

## 29è CICLE DE FÍSICA OBERTA

# The Black Hole at the Centre of the Milky Way

a càrrec del professor Rainer Schödel,

Cap del grup del "Galactic Center"  
Training Coordinator of the IAA-CSIC Severo Ochoa  
Excellence Programme  
Instituto de Astrofísica de Andalucía - CSIC

The 2020 Nobel Prize for Physics was awarded to Andrea Ghez of UCLA and to Reinhard Genzel of the Max-Planck-Institute for Extraterrestrial Physics. This talk will review the infrared observations carried out by their teams over 30 years to show that the radio source Sagittarius A\* at the centre of the Milky Way is related to a massive black hole of four million solar masses, and to test General Relativity in the vicinity of this object. I will tell the story of this experiment and describe the current status of research on SagittariusA\*.

**Dijous, 17 de desembre de 2020  
a les set de la tarda (19:00 h)**

Us convidem a assistir-hi, de manera virtual, a través dels nostres canals
